

Terri Bonadio is currently the Director, Clinical Innovation & Education for Home Therapies with Fresenius Medical Care's Renal Technologies Group. Serving most of her career in the dialysis industry, she held leadership roles within Home Hemodialysis, as well as Clinical Education and Professional Education for over fifteen years. As Director of Professional Education, she co-founded the Advanced Renal Education Program, designed to provide nephrologists and dialysis nurses with access to a wealth of in-depth training resources, eLearning courses, and scientific reviews.

Terri is a registered nurse with certification in Nephrology Nursing and holds a Bachelor's Degree in Healthcare Administration. She is also the author or co-author of more than three dozen abstracts, book chapters, peer-review journals, and other publications.
